Thickness of board – 1.2mm

Weight of glue – 18gms

Number of boards per pack – 10pcs per inner box, then 10 inner boxes per carton.

Application

Simply place glue boards along runways against wall where rat activity has been seen. Rat glue boards can be used in a variety of situations, from home to office. To increase efficiency one dose of rat lure can be applied in bait holder.

Inspection of Rat Glue Boards

Where Rat glue boards are used must be inspected at appropriate intervals. Rat Glue boards should be checked within 12 hours of placing. Records must be updated after all inspection.

Non-Target Species

Rat glue boards must be placed as they do not present a risk to non target species. In the event that a non-target species is trapped, a suitable food grade oil or similar emollient should be applied for removal.

Dispatch of trapped Rodents

Rats trapped on glue boards must be dispatched of quickly and humanely by technicians with appropriate training. The human use of glue board is the legal responsibility of the pest controller and cannot be delegated to untrained people.

Dispose of glue Boards

Rat glue board should be disposed of with care. Sticky surface should be covered to avoid the accidental trapping on non-target species. It should be disposed of in accordance with local authority requirements.
